

GRAfx 8 prints all images on an Epson 9880 with Ultrachrome Ink (K3) and the newest 12 color printer from Cannon, the IPF 8000. When capturing your original artwork, or importing your file for proofing, there is an initial set-up charge. This includes the importing and color correcting of your image in the first stage of the proofing process. Additional work, ie; fixing blemishes on the image in the computer, that you don't wish to show up on the print, or other custom work will be an \$80 per hr. charge. Finally you will be asked to participate in the final stage of the proofing process before your artwork is reproduced, insuring your satisfaction with the final product. All prints are on 100% acid free substrates with archival inks, and if kept under conservation glass, may be expected to remain lightfast for over 100 years or more.
